# SLICE™ 230

*Maximum capability. Minimum compromise.*

The **SLICE™ 230** is AMTI Products' most advanced programmable cutter - built to handle the largest range of tubing, sleeving, and wire with unmatched speed, precision, and throughput. Its adjustable 1.5" opening, 150+ memory slots, optional multi-feed, and barcode scanning make it the system of choice for high-volume production teams.

## Applications

- Thick and large-diameter heat shrink tubing
- Enhanced adhesive wall stick processing (up to 5 sticks simultaneously)
- Expanded loom tube and convoluted tubing
- Power cables and heavy jacketed wire

## Performance Advantages

- Adjustable 1.5" opening for wider material profiles
- Stores 150+ custom programs for high mix/volume
- Optional Multi-STICK system enables multi-stick feed
- Barcode scanning compatible for job switching
- Air-powered guillotine with max cutting force
- Operates in English or Spanish
- Largest programmable capacity in the **SLICE™** lineup
- Backed by AMTI's 2-Year Warranty & US-based support

**SLICE™ Series**
